Hi, I'm John Smith
I design and build things.

About Me

John Smith is a web developer with a passion for creating clean, user-friendly interfaces. He has experience in front-end development using HTML, CSS, and JavaScript, as well as back-end development using Node.js and MongoDB. He is also skilled in responsive design and mobile optimization. In his free time, he enjoys playing soccer and traveling.

As I go back and look at my previous works, I've realized I stick to a simple-ish layout. That isn't a bad thing though as it make my work look cohesive and pretty good.

In my ISU BFA submission portfolio, I used a lot of simple shapes such as lines. I used lines to guide the viewer from the title of the project to the project description.

Since I use simple shapes, I want to convey those on my website.

I want to include those lines as guides or possibly even use the grid lines as a part of my design.
